

FLEXIBLE SOLUTION

VERSATILE

The Prova System can be used for banisters, balconies and handrails

SAFE

The Prova System – a safe choice, tested to meet current regulations.

FLEXIBLE

Its special elements mean that the Prova System is suitable for almost all installation situations.

ADJUSTABLE

One unique feature is the Prova System's equalizer for installing newel posts on uneven surfaces.

WEATHERPROOF

The Prova System is made of aluminium and stainless steel. All components (except wooden handrails) are suitable for interior and exterior use.

DESIGN

Anodised aluminium handrails, stainless steel tubes and aluminium parts lacquered in RAL tone 9006 give the Prova System a modern look.

EASY ASSEMBLY

The Prova System consists of a small number of easily assembled components.

INTERNET

Look out for suggestions and visit dolte.com/pl where you will find information on dimensions and assembling the banister system.

NEWEL POST
